This report is calculated from the birth details you supplied using the Swiss Ephemeris, the sidereal zodiac with Lahiri ayanamsa, whole-sign houses and mean lunar nodes — the conventions most widely used in Indian (Vedic) astrology.

Read it as a mirror for reflection rather than a verdict. Traditional astrology describes tendencies and timing themes; your choices, effort and circumstances shape what actually happens.

ALL SYLLABLES OF THIS STAR

Ve, Vo, Ka, Ki

In the Namakarana tradition, a child's name begins with the syllable linked to the pada (quarter) of the Moon's nakshatra. For your baby that is “Ve”. Families often use any syllable of the same nakshatra.

Mrigashira, the deer’s head, belongs to Soma and is the nakshatra of the search. Like a deer that keeps sniffing the air, its natives are curious, gentle and always looking — for knowledge, beauty, the right partner or the next place. Mars gives that searching an active edge. Mrigashira people are often good researchers, travellers and conversationalists, though restlessness can make contentment elusive.

In Indian astrology the Moon sign (rashi) is as important as the ascendant: it describes your mind, emotional needs and how you experience life day to day. Your Moon is in Taurus (Vrishabha), in the 11th house of your chart.

Vrishabha is the most settled of the twelve signs. Where Mesha starts, Vrishabha builds and keeps. Venus gives it an eye for quality, a sensual appreciation of music, fabric and food, and patience that others mistake for slowness. Because the Moon is exalted here, classical writers considered it a sign of contentment — Vrishabha people often know what they value and are not easily talked out of it.

Your birth star: Mrigashira

Mrigashira, the deer's head, belongs to Soma and is the nakshatra of the search. Like a deer that keeps sniffing the air, its natives are curious, gentle and always looking — for knowledge, beauty, the right partner or the next place. Mars gives that searching an active edge. Mrigashira people are often good researchers, travellers and conversationalists, though restlessness can make contentment elusive.

Traditional strengths of this star: Curiosity; Gentleness and sensitivity; Research ability; Good conversationalist.

Your Moon falls in pada 1 of Mrigashira, whose traditional name syllable is "Ve". Your Vimshottari dasha sequence begins with Mars, the lord of this nakshatra.

LAGNA LORD

Moon

LORD PLACED IN

11th house, Taurus

Your ascendant (lagna) is the sign rising on the eastern horizon when you were born. It describes your body, temperament and the lens through which you meet life. For you this is Cancer (Karka), a water sign ruled by Moon.

Karka is the Moon's own sign, so emotion is its native language. Like the crab, it has a protective shell and a soft interior: Karka people may seem reserved until they trust you, then become fiercely loyal. Being a movable sign, Karka is not passive — it takes initiative on behalf of family, home and the people it feels responsible for.

Natural strengths

Empathy and emotional intelligence; Loyal, nurturing, protective; Excellent memory; Creates a sense of home wherever it goes.

Growth areas

Not taking every remark personally; Letting go of the past; Asking for care as readily as giving it.

Your lagna lord: Moon in the 11th house

The ruler of your chart, Moon, sits in your 11th house — the house of income, friends, elder siblings, communities and fulfilment of wishes. Much of your energy and sense of purpose naturally flows toward these areas of life. It is exalted here, so its qualities are traditionally said to work at their strongest and most constructive.
